

**A GUIDE TO CONTENTS OF JOURNAL RSES IN ENGLISH:
INTERNATIONAL STUDIES ON REGIONAL AND SECTORAL
ECONOMICS, 2001-2024**
GUISAN, Maria-Carmen*

Abstract

This study presents a Guide to contents of articles in English published in Regional and Sectoral Economic Studies (RSES) for 2001-2024. The aim is to facilitate diffusion of interesting studies. We present 3 tables for each of 10 geographical areas, indicating the country of the study and including a link to a free downloadable version. The Guide may be useful for researchers, students preparing a Degree Project, or a Master or Doctoral Thesis, and for other readers interested in regional and sectoral economic studies. The Guide in English includes 287 articles: 55 of American countries 132 of European countries and OECD comparisons, 33 of Eurasia, 19 of Africa, 38 of Asia, and 10 on World Development. In another article of year 2024 we publish the Guide to 118 articles of RSES in Spanish (of which 47 correspond to Latin American countries). We expect these Guides will be of help for a lasting readership and diffusion of many interesting articles, which may contribute to foster economic policies and improve development and quality of life in many regions.

JEL codes. O51

Keywords: Guide to Contents, Regional Development, Production by Sector, International Comparisons of Development, OECD, World Development

1. Introduction: A Guide to journal contents 2001-2024

Journal RSES has finished publication in year 2024, after 24 years of academic success and intense editorial job for the small Editorial team of our Association. As stated at the farewell by the Editor, in Guisan(2025a), we hope that new editorial initiatives by other researchers, with more energies and more support, will foster new publications of articles on the topics of regional and sectoral economic development.

For 2001-2024 the journal RSES has got good positions at Ideas.Repec, by the number of downloads per item, and academic recognition, with inclusion in the Index Scopus of Elsevier and other prestigious indexes of academic journals. More than 450 articles published in the journal RSES are an interesting set of contributions that we deem may be helpful to many researchers currently and in the next years.

The aim of this guide is to contribute to the diffusion of this research by presenting the list of contents of journal classified accordingly to 1) geography: the countries or territories of the empirical studies. 2) period of time of publication, authors and a short description of the topic. The lists include link to the Abstract and pdf of each article at Ideas.Repec.

*Maria-Carmen Guisan. Professor of Econometrics for 1987-2017 at the Faculty of Economics, University of Santiago de Compostela, Spain. Editor of RSES. E-mail: mcarmen.guisan@usc.es. Links to CV at Entry 1 of the Blog: <https://euroamericanassociation.blogspot.com>

Journal RSES has been published by Euro-American Association of Economic Development Studies (EAAEDS).

In this Guide we include tables of contents in English of Volumes 1 and 2 of each year of the period 2001-2014.

In another article by Guisan(2024 b) we include table of contents of Volumes 1 and 2 in Spanish, and a reference to a few articles in other European languages (French, Portuguese and Italian).

Besides, the RSES journal has published 5 extraordinary volumes (Volume 3 of years 2010 to 2014), by agreement with the Association of Economics of Education, with 32 articles in English and 19 in Spanish. All the articles are downloadable at ideas.Repec and Dialnet.

In the next sections we classify the articles in English of Volumes 1 and 2 of journal RSES by country of the study and 3 periods of publication: 2001-2012, 2013-2018 and 2019-2024.

Section 2 include links to 132 articles of Europe: including international comparisons among European and OECD countries (44) as well as articles on Spain (41) or on other European countries (47).

Section 3 include links to 55 articles of America: Tables 4.1 to 4.3 correspond to the United States and tables 5.1 to 5.3 to Latinamerica and other American countries.

Section 4 corresponds to 33 articles of Eurasia. Tables 6.1 to 6.3 include Russia, Turkiye, Caucasian countries (Armenia, Azerbaijan and Georgia) and Central Asian countries that were former USSR countries.

Section 5 corresponds to 19 articles of Africa: Tables 7.1 to 7.3 include Northern Africa and tables 8.1 to 8.3 Subsaharan Africa or studies on both (North and Subshara).

Section 6 corresponds to 38 articles of Asia and Pacific: Tables 9.1 to 9.3 include information of articles related with China, India, Indonesia and other countries of those areas.

Section 7 refers to 10 articles of RSES on World development or international comparisons of countries of several geographical areas, in tables 10.1 to 10.3.

Section 8 includes a summary and some final comments.

After the Bibliographical References we include some links to other publications of our Association on international development.

2. Europe, including comparisons of Europe and other OECD countries.

Tables 1.1 to 1.3 include 44 articles on international comparisons of several European countries, in some cases with comparisons with the U.S. and other OECD countries.

Tables 2.1 to 3.3 includes regional and sectoral studies of one European country (37 of Spain and 29 of other countries)

Guisan(2022) compares subjective and objective indicators of quality of life in OECD with other areas of the World, and analyzes quality of life in 36 countries and 372 OECD regions.

The article by Guisan(2023) presents a comparison of economic development, for the period 2000-2021, of 5 major European countries (France, Germany, Italy, Spain, the United Kingdom) with 8 large regions of the United States, accordingly to the classification from the Bureau of Economic Analysis (New England, Mideast, Great Lakes, Plains, Southeast, Southwest, Mountains, Far West).

Perez-Ortiz et al (2020) analyse quality of labor and gender equality in 28 European countries in years 1997, 2007 and 2017

In tables 4.1 to 4.3 there are 46 articles of regional and/or sectoral development of other European countries: Croatia, Finland, Germany, Greece, Italy, Portugal, Ukraine and the United Kingdom.

Besides, several articles of tables 1.1 to 1.3 include studies of EU27 countries, as well as Switzerland, Norway and Central and Eastern Europe countries. Many of the articles of those sections include analysis of regional and sectoral development of the five major European economies (France, Germany, Italy, Spain and the United Kingdom).
